Project Name	Smart Lender – Loan Approval Prediction System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Many loan applicants are uncertain about whether their loan applications will be approved before submitting them. Financial institutions also spend more time reviewing applications during the initial screening process.

1. CUSTOMER SEGMENT(S) [CS] • Loan Applicants • Bank Customers • Self-employed Individuals • Bank Employees	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] • Limited financial knowledge • Lack of banking guidance constraints • Budget limitations • Time constraints	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Pros: Online loan eligibility calculators, manual bank verification. Cons: Time-consuming, no instant ML prediction.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] • Uncertainty about loan approval (High) • Manual verification delays (High) • Repeated loan application rejection (Medium)	9. PROBLEM ROOT / CAUSE [RC] • Lack of awareness of eligibility criteria • Manual verification process • Dependence on bank officials	7. BEHAVIOR + ITS INTENSITY [BE] • Frequently search for loan eligibility information online. • Visit multiple banks before applying. • High dependence on loan prediction tools.
3. TRIGGERS TO ACT [TR] • Need for home loan • Need for business loan • Quick loan eligibility check before applying	10. YOUR SOLUTION [SL] Smart Lender uses Machine Learning to predict loan approval instantly based on applicant details using a Flask web application, helping users make informed decisions before applying.	8. CHANNELS OF BEHAVIOR [CH] ONLINE: Website, Bank Portals, Search Engines OFFLINE: Banks, Financial Institutions, Loan Consultation Centers.
4. EMOTIONS BEFORE / AFTER [EM] Before: Confused, uncertain, anxious. After: Confident, informed.
