

## Project Demo Planning

|                      |                                                |
|----------------------|------------------------------------------------|
| <b>Date</b>          | 6 July 2026                                    |
| <b>Team ID</b>       | XXXXXX                                         |
| <b>Project Name</b>  | Smart Lender – Loan Approval Prediction System |
| <b>Maximum Marks</b> | 1 Mark                                         |

### Project Demo Planning:

A well-structured demo plan ensures that the Smart Lender – Loan Approval Prediction System is presented effectively by covering all key functionalities in a clear and organized manner. This document outlines the project demonstration plan, including the sequence of the demo.

| S.No | Demo Section               | Description                                                                                  | Duration (mins) | Responsible Member |
|------|----------------------------|----------------------------------------------------------------------------------------------|-----------------|--------------------|
| 1    | Introduction               | Introduce the Smart Lender project, objectives, and problem statement.                       | 2               | Alfisha Maheen     |
| 2    | Solution Overview          | Explain the system architecture, technologies used, and workflow.                            | 3               | Surya Teja         |
| 3    | Live Loan Prediction Demo  | Demonstrate the application by entering applicant details and showing the prediction result. | 5               | Sonu               |
| 4    | Machine Learning & Backend | Explain the trained ML model, Flask backend, preprocessing, and prediction process.          | 3               | Alfisha Maheen     |
| 5    | Deployment Demonstration   | Show the live application hosted on Render and explain deployment.                           | 2               | Surya Teja         |
| 6    | Conclusion                 | Summarize the project, discuss future enhancements.                                          | 2               | Sonu               |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                     |
|------|----------------------------------|---------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Explain the need for an intelligent loan approval.                        |
| 2    | Solution Overview                | Describe the architecture, technologies, and Machine Learning workflow.   |
| 3    | Live Feature Demonstration       | Show the loan prediction process using the live Smart Lender application. |
| 4    | Q&A Session                      | Answer questions from the faculty and explain implementation details.     |
