Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data (e.g., Customer, Admin).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Loan Prediction Processing, Machine Learning Prediction).
Rectangle (solid fill, no number)	Data Store	A place where data is stored for later use (e.g., Loan Prediction Dataset, Trained Model).
Labeled arrow	Data Flow	The movement of data between external entities, processes, and data stores, labeled with the information being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
